**Constitution-Class Heavy Cruisers**

Constitution-class starships were first introduced in 2240, although few were initially built. The primary differences between the *Chesapeake* and the *Constitution* are the warp engines and the engineering hull. These vessels have served Starfleet in maintaining the Federation’s borders during times of peace and war. They are also capable of extensive survey, scientific, exploratory and research missions to outlying areas of Federation territory. Many ships of this class were destroyed in the Kelvan War of 2285. Subsequent variations of this class (the *Bonhomme Richard*, the *Achernar* and the *Tikopai*) are still considered by most as Constitution-class vessels.

**Ships of the Class:**
- NCC-1700 U.S.S. *Constitution*
- NCC-1701 U.S.S. *Enterprise*
- NCC-1702 U.S.S. *Farragut*
- NCC-1703 U.S.S. *Lexington*
- NCC-1704 U.S.S. *Yorktown*
- NCC-1705 U.S.S. *Excalibur*
- NCC-1706 U.S.S. *Exeter*
- NCC-1707 U.S.S. *Hood*
- NCC-1708 U.S.S. *Intrepid,* destroyed
- NCC-1709 construction contract for *Constellation*
- NCC-1710 U.S.S. *Kongo*
- NCC-1711 U.S.S. *Potempkin*
- NCC-1017 U.S.S. *Constellation*

*Renumbered after construction to NCC-1017.

All ships of this class were refitted as Constitution-II class vessels in 2273 and 2274.

**Notes on the Constitution Class**

There has been some confusion among starship enthusiasts regarding the numbering of Starfleet vessels. Many Constitution-class vessels were often ascribed as having different numbers based on a chart seen in Commodore Stone’s office at Starbase 11. However, those were not the construction contract numbers (a.k.a. hull numbers) of the heavy cruisers, but were rather work-orders for each of the vessels in orbit. Complicating matters is Starfleet’s long-standing policy not to be specific about its actual fleet numbers.

Furthermore, rarely were all twelve original Constitution-class vessels were in service at the same time. The U.S.S. *Hood* was decommissioned for a year (2258-2259) while it was extensively repaired. The same holds true for the starships *Exeter* (2268) and *Excalibur* (same year).

Despite this, this class of vessel is probably held in the highest regard. The *Bonhomme Richard*, *Achernar* and *Tikopai* classes are simply variants based on this design. The Constitution-class is presently being phased out in favor of the Excelsior-class.
CONSTITUTION-CLASS HEAVY CRUISERS

The Constitution-class heavy cruisers were commissioned by the United Federation of Planets to maintain order and explore the uncharted regions of our galaxy. Assembled in space, each ship is capable of extended starflight for up to five years without refurbishment.

To carry out its mission of exploration, each heavy cruiser is equipped with elaborate sensing and recording equipment, complete laboratories, and small, manned shuttlecraft for short-range missions. The highly trained multi-racial crew includes Academy-trained officers, scientists, and ship engineering specialists. Of the 430 crew members, approximately one-third are female. A maze-like ship interior contains adequate space for the crew to live and enjoy limited recreation.

Sub-light speed propulsion is supplied by the impulse engines located in the rear of the saucer-shaped hull section. Impulse power is supplemented by a powerful thruster maneuvering system. Starflight capability is provided by the two matter/anti-matter propulsion units which allow the ship to ‘warp’ normal space and exceed the speed of light. Navigational deflector beams sweep out far ahead of the vessel’s path to deflect space debris and other objects which could cause damage at hyper-light speeds.

Often the Federation’s only representative in distant regions of space, each heavy cruiser must function as a police cruiser and warship. When threatened, the giant ship can become a formidable warship with its powerful phaser banks, photon torpedoes, and energy shields.
**Bonhomme Richard-class starships** (a variant of the *Constitution* class) were first introduced in 2256. The primary differences between the *Bonhomme Richard* and the *Constitution* are the internal arrangements of the engineering hull. Those differences resulted in a slightly different warp engine configuration when the ships of this class were uprated in 2275. These vessels have served Starfleet in maintaining the Federation's borders during times of peace and war. They are also capable of extensive survey, scientific, exploratory and research missions to outlying areas of Federation territory. Several ships of this class have been permanently stationed in star systems such as those of Serenidad and Coridan in order to protect and preserve Federation interests. Many ships of this class were destroyed in the Kelvan War of 2285.

**Ships of the Class:**

- **NCC-1712 U.S.S. Bonhomme Richard**
- **NCC-1713 U.S.S. Monitor**
- **NCC-1714 U.S.S. Hornet**
- **NCC-1715 U.S.S. Merrimac**
- **NCC-1716 U.S.S. Endeavor**
- **NCC-1717 U.S.S. Defiance**
- **NCC-1718 U.S.S. Excelsior** (destroyed in 2273)
- **NCC-1719 U.S.S. Beagle**
- **NCC-1720 U.S.S. Lafayette**
- **NCC-1721 U.S.S. Wasp**
- **NCC-1722 U.S.S. El Dorado**
- **NCC-1723 U.S.S. Ari**
- **NCC-1724 U.S.S. Republic (II)**
- **NCC-1725 U.S.S. Tori**
- **NCC-1726 U.S.S. Krieger**
- **NCC-1727 U.S.S. Essex** (destroyed in 2275)
- **NCC-1728 U.S.S. Constellation (II)** (destroyed in 2275)
- **NCC-1729 U.S.S. Exeter (II)**
- **NCC-1730 U.S.S. Intrepid (II)**
- **NCC-1731 U.S.S. Valiant (II)**

All surviving ships of this class were refitted as *Bonhomme Richard II*-class ships in 2275.

* The *Raleigh* was originally to have been christened the *Saratoga* because of damage that *Miranda*-class ship suffered in 2258. However, the *Saratoga* underwent extensive repairs and was never decommissioned. The Naval Construction Contract was reassigned as the *Raleigh* instead.

** The *Truxton* was originally to have been christened the *Constellation*, but Starfleet designers chose to honor the crew of that fabled starship was a new class of starship instead of commissioning a ship in their honor.

*** The *Commencement* reportedly was rumored to have been named *Intrepid* due to a clerical error, but Starfleet denies this account.
Achernar-class starships (a variant of the Constitution class) were first introduced in 2265. The primary difference between the Achernar and the Constitution is the addition of another phaser bank at the rear of the engineering hull. These vessels have served Starfleet in maintaining the Federation's borders during times of peace and war. They are also capable of extensive survey, scientific, exploratory and research missions to outlying areas of Federation territory. The design was uprated in 2274. Many ships of this class were destroyed in the Kelvan War of 2285.

All surviving ships of this class were refitted as Constitution II-class ships 2274-2277.
Tikopai-class starships (a variant of the Constitution class) were first introduced in 2268. The primary difference between the Tikopai and the Constitution is the relocation of the hangar deck to the rear of the upper primary hull, and the addition of another sensor array at the rear of the engineering hull. These vessels have served Starfleet in maintaining the Federation’s borders during times of peace and war. They are also capable of extensive survey, scientific, exploratory and research missions to outlying areas of Federation territory. Many ships of this class were destroyed in the Kelvan War of 2285.

**Ships of the Class:**

- NCC-1825 U.S.S. Helios
- NCC-1826 U.S.S. Deneb
- NCC-1827 U.S.S. Adhara
- NCC-1828 U.S.S. Alith
- NCC-1829 U.S.S. Alkaid
- NCC-1830 U.S.S. Alnilam
- NCC-1831 U.S.S. Arided
- NCC-1832 U.S.S. Bellatrix
- NCC-1833 U.S.S. Castor
- NCC-1834 U.S.S. Dubhe
- NCC-1835 U.S.S. El Nath
- NCC-1836 U.S.S. Miaplacidus
- NCC-1837 U.S.S. Mirfak refit as Lantree (Miranda) in 2285
- NCC-1838 U.S.S. Murzim
- NCC-1839 U.S.S. Polaris
- NCC-1840 U.S.S. Regulus
- **NCC-1841 U.S.S. Shaula**
- NCC-1842 U.S.S. Wezen
- NCC-1843 U.S.S. Atlantis see note below

All surviving ships of this class were refitted as Tikopai II-class ships in 2278.

In 2283, the Atlantis was developed as a Constitution III-class starship and renumbered as NCC-1701-A and re-christened as the Enterprise in 2284.
Miranda-class starships were first introduced in 2243. This vessel has served Starfleet in maintaining the Federation’s borders, conducting scientific research, placing navigation, hazard and prohibition buoys, and transporting marines and cargo as needed.

All ships of this class were refitted as Miranda II-class ships in 2278.
Voskhod-class starships were first introduced in 2271 to supplement the number of fighting ships of the Forrestal- and Ranger-class. This vessel has served Starfleet in maintaining the Federation’s borders from pirates, renegades and even invasion fleets, but they also can be used as a buffer between Federation members on the verge of war. They are also capable of being used as mine sweepers and mine tenders during wartime operations.

**Ships of the Class:**

- NCC-1900 U.S.S. Voskhod
- NCC-1901 U.S.S. Zierau
- NCC-1902 U.S.S. Vostok
- NCC-1903 U.S.S. Prospero
- NCC-1904 U.S.S. Uchinoura
- NCC-1905 U.S.S. Canberra
- NCC-1906 U.S.S. Black Prince
- NCC-1907 U.S.S. Zefiro
- NCC-1908 U.S.S. Luna
- NCC-1909 U.S.S. Jiuguan
- NCC-1910 U.S.S. Buran
- NCC-1911 U.S.S. Progress
- NCC-1912 U.S.S. Renegade refit as Miranda class in 2278
- NCC-1913 U.S.S. Xar Kol
- NCC-1914 U.S.S. Nimrod
- NCC-1915 U.S.S. Yuanwang
- NCC-1916 U.S.S. Molnyia

Soyuz-class starships were first introduced in 2271 to supplement the number of fighting ships of the Forrestal- and Ranger-class, but had a more extended crew weapons bay than the Voskhod. This vessel has served Starfleet in maintaining the Federation’s borders from pirates, renegades and even invasion fleets, but they also can be used as a buffer between Federation members on the verge of war. The Federation began decommissioning the Soyuz-class following the Kelvan War as most proved worthless in campaigns against their forces. By 2288, all had been removed from active duty service.

**Ships of the Class:**

- NCC-1930 U.S.S. Soyuz
- NCC-1931 U.S.S. Shenzhou
- NCC-1932 U.S.S. Ariane

- NCC-1934 U.S.S. Kliper
- NCC-1935 U.S.S. Kuru
- NCC-1936 U.S.S. Long March
- NCC-1937 U.S.S. Saratoga refit as Miranda class in 2278
- NCC-1938 U.S.S. Energia
- NCC-1939 U.S.S. Crews
- NCC-1940 U.S.S. Black Night
- NCC-1941 U.S.S. Bozeman lost in 2278
- NCC-1942 U.S.S. Surkam
- NCC-1943 U.S.S. Missouri
**Fast Cruisers**

Constellation-class starships were first introduced in 2284. They were intended to replace the aging Leonidas-class cruisers, many of which had been destroyed over the years. They have served Starfleet in the exploration of deep space, but also have impressive research facilities and the even means of transporting small fighter wings.

NCC-2010 U.S.S. Jenolen was missing since 2294.
Federation-class starships were first introduced in 2248 in response to the Battle for Donatu V. These dreadnoughts were never as fast as intended, but were certainly quite powerful. Prior to the Kelvan War, only one of them was lost (presumed destroyed) during the Klingon incursions into Federation space in the mid-2270s. The dreadnoughts were uprated in 2277 and were the pride of Starfleet until all but one of them was destroyed during the Kelvan War. The lone survivor, the Alliance, was itself destroyed during an accidental incursion into Romulan space in 2295.

Starfleet is considering an Excelsior-based design for replacing these starships.

- **NCC-2120** U.S.S. Entente

**Federation II-Class**

- **NCC-2100** U.S.S. Federation
- **NCC-2101** U.S.S. Star League
- **NCC-2102** U.S.S. Unificatum
- **NCC-2103** U.S.S. Compactat
- **NCC-2104** U.S.S. Corporation
- **NCC-2105** U.S.S. Coalition
- **NCC-2106** U.S.S. Konkordium
- **NCC-2107** U.S.S. Star System
- **NCC-2108** U.S.S. Affiliation
- **NCC-2109** U.S.S. Concordat
- **NCC-2110** U.S.S. Directorate
- **NCC-2111** U.S.S. Organization
- **NCC-2112** U.S.S. Star Union
- **NCC-2113** U.S.S. Alliance
- **NCC-2114** U.S.S. Confederation
- **NCC-2115** U.S.S. Dominion
- **NCC-2116** U.S.S. Star Empire
- **NCC-2117** U.S.S. Trusteeship
- **NCC-2118** U.S.S. Association
- **NCC-2119** U.S.S. Consortium
- **NCC-2120** U.S.S. Entente

**Ships' Dimensions:**

- **Federation-Class**
  - Length: 320.0m
  - Width: 140.0m
  - Height: 87.0m
- **Federation II-Class**
  - Length: 323.9m
  - Width: 147.5m
  - Height: 92.2m

**Ship's Complement:**

- **Federation-Class**
  - Officers: 55; Crew: 445
- **Federation II-Class**
  - Officers: 65; Crew: 445

**Weaponry:**

- **Federation-Class**
  - Phasers: 5 Banks of 2 Cannons
  - Photon Torpedoes: 2 Tubes
- **Federation II-Class**
  - Phasers: 12 Banks of 2 Cannons
  - Photon Torpedoes: 2 Tubes
**Napoleon-class** starships were first introduced in 2249. This vessel has served Starfleet in transporting fighters and shuttlecraft throughout the Federation as needed either for purposes of war or exploration. The original intent of Starfleet was not to introduce fighters into interstellar warfare, however encounters with Orion pirates, Kzinti privateers and Tholian police cruisers convinced them that a small fighter force was necessary for the security of the Federation.

**Ships of the Class:**

- NCC-2200 U.S.S. Napoleon
- NCC-2201 U.S.S. Wellington
- NCC-2202 U.S.S. Suvorov
- NCC-2203 U.S.S. Leclerc
- NCC-2204 U.S.S. Montgomery
- NCC-2205 U.S.S. Gorfo
- NCC-2206 U.S.S. Clay
- NCC-2207 U.S.S. Malik
- NCC-2208 U.S.S. Sodon

**Dakota-class** starships were first introduced in 2279 as the Napoleon-class became more and more obsolete. The Dakotas were designed to transport larger fighters and shuttles at an even faster velocity.

**Ships of the Class:**

- NCC-2300 U.S.S. Dakota
- NCC-2301 U.S.S. Choktaw
- NCC-2302 U.S.S. Muscogee
- NCC-2303 U.S.S. Hopi
- NCC-2304 U.S.S. Kiowa
- NCC-2305 U.S.S. Miccosukee
- NCC-2306 U.S.S. Pawnee
- NCC-2307 U.S.S. Seminole
- NCC-2308 U.S.S. Shawnee
- NCC-2309 U.S.S. Blackfeet
- NCC-2310 U.S.S. Arapahoe
